DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 15 and 26 are rejected under 35 U.S.C. 102(b) as being anticipated by Czimmek et al (6,476,599) or Kather et al (5,791,305).

The references measure at least one electromagnetic property of an actuator, selects a correcting variable and adjust the electromagnetic property by directly taking this correcting variable into account.

Allowable Subject Matter

Claims 16-25 and 27 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: The above mentioned claims recite more detailed limitations related to the implementation of the controllable actuator arrangement that are not taught or fairly suggested by the prior art of record.
